

Ratchet Type Tool MBT-004

Product Information

- ❖ Ratchet type tool MBT-004 is a way of binding stainless steel banding around different elements securely.
- ❖ It keeps the tension tight on the strapping bands as they fasten the components together.
- ❖ The ratchet style heavy duty forged steel banding tool. Used with up to 25mm width and 1.15mm thick stainless steel banding.
- ❖ The ratchet type tool is made of galvanized steel, which is resistant to impacts and wear.

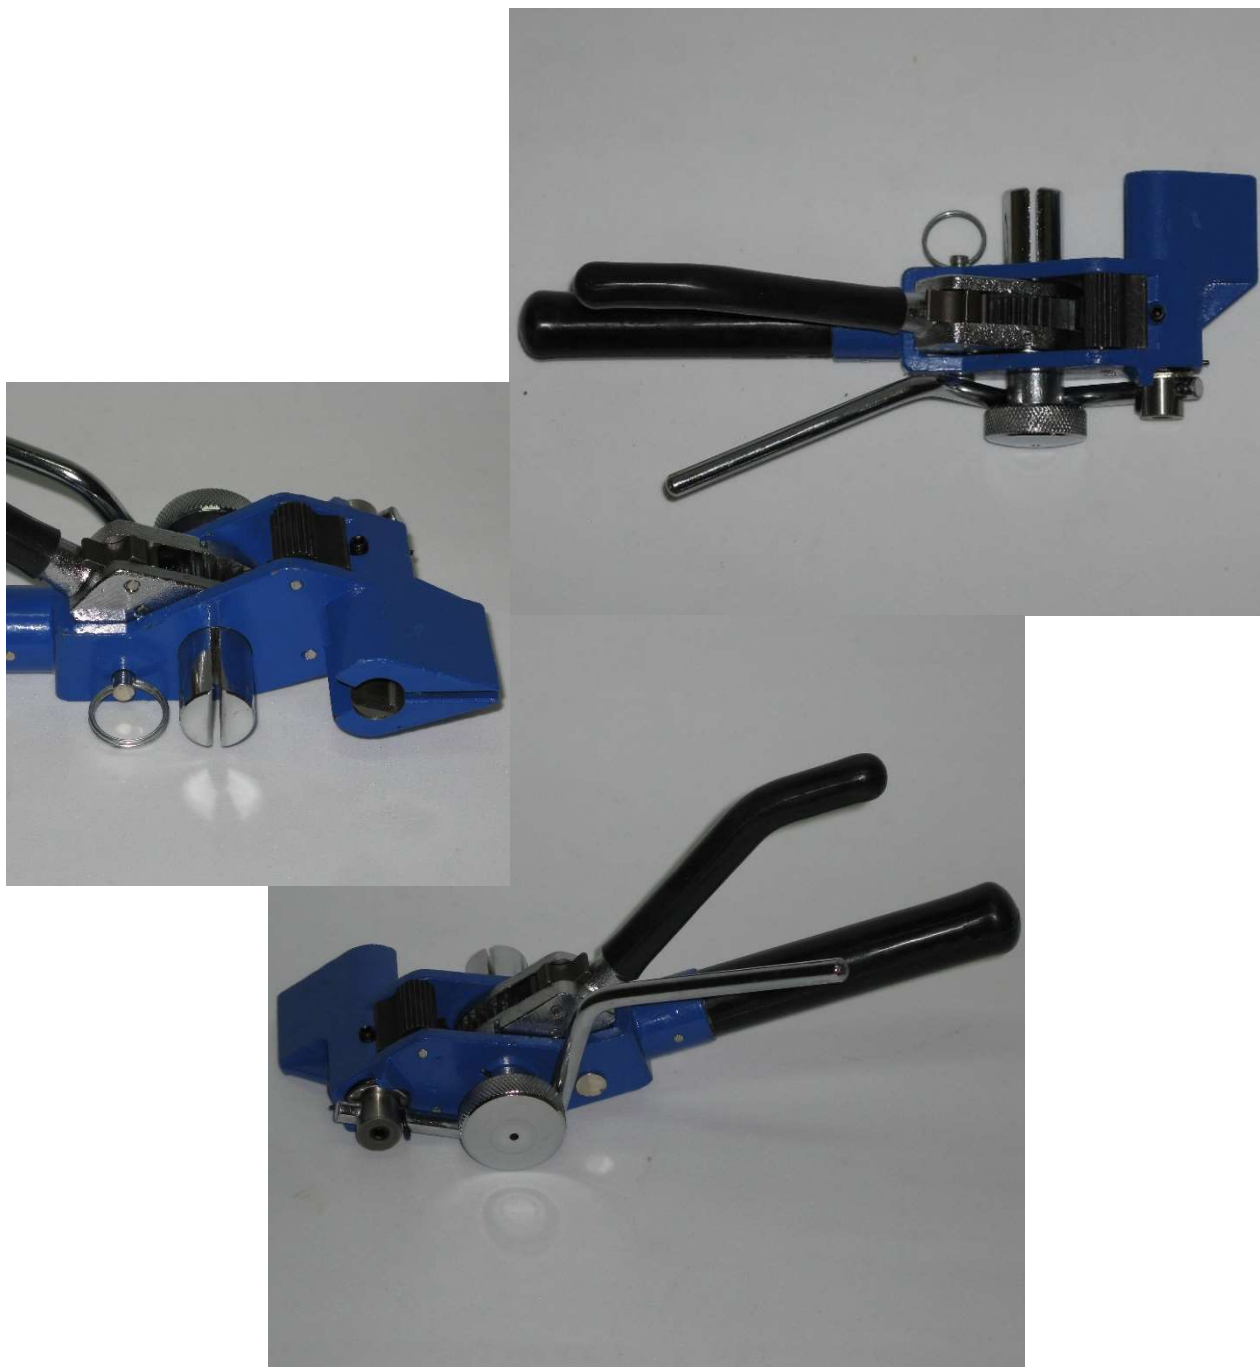

Technical Specifications

Type	MBT-004

Net weight	1.800 kg
Material	Stainless Steel

Ratchet Type Tool Manual

- ❖ Slide the band through the buckle. Note position of buckle, with buckle ears held up and away from the operator
- ❖ Pull the band tightly around the pole/box and through the buckle. Note one inch distance between buckle and the pole/box
- ❖ Hold tool in your left hand and line up the slots in the nose and ratchet so they are on a straight line
- ❖ Insert the band through nose and ratchet slots, and hold short handle in right hand. Push long handle forward in full arc with left hand to tightens the band
- ❖ Move tool forward and away from the buckle. Press the severed band end downward between the ears with the thumb
- ❖ Hammer down the ears with the knob security locking the tape.
